04-08-2008

TO WHOM SO EVER IT MAY CONCERN

This to certify that the Power Systems Division of Central Power Research Institute has used the PowerApps power system simulation software successfully for the following studies:

- (1) Load Flow and Short Circuit Calculations of Raichur Thermal Power Plant Network leading to relay coordination,
- (2) Load Flow and Short circuit calculations (both conventional and G74 (IEC909) Standard) for Rourkela Steel Plant Renovation and Modernization schemes , and
- (3) Load Flow and Energy Audit for Southern Power Distribution Company of Andhra Pradesh.

The results obtained were acceptable to CPRI as well as their clients. The developer of the software was very much receptive to the customization requirements whenever warranted.
